OUTLINE

PROTOTYPE

The screenshot displays the Adhoc View Environment application with several open windows:

- Adhoc View Environment** (Main Window): Contains a menu bar (File, Provider, Summary, etc.) and a toolbar.
- Ass. Providers - 那っこう**: A list of providers including 'である2', 'である1', 'vaio', 'vaio u3', and 'あすらん'.
- Long Term Cache**: Shows a tree view of cached data for 'IC00.CAG - http://0050CD150FC2', including 'summary.rss' and 'summary2.rss'.
- RQL Builder**: A window for constructing RQL queries, showing a table with keys like 'pv_no' and 'nexthtml'.
- QuerySheet Component**: A table with columns 'TITLE' and 'DESCRIPTION', listing various content items and their descriptions.
- Provider Inspector**: A detailed view of a provider's metadata, including fields like 'title', 'link', 'btd-address', 'btd-cod', 'btd-countrycode', 'btd-friendlyname', 'btd-latestlink', 'btd-latestseen', 'btd-linkpolicy', 'btd-impsubversion', 'btd-impversion', 'btd-manufactureid', and 'pvdstatus'.
- RQL View Browser**: A central window displaying search results for 'Nine Inch Nails Website' and 'Google 検索エンジン google'. It lists various content packages such as 'presentation', 'music_cd', 'movie_theater', and 'folder' with their respective titles and descriptions.
- Bottom Right Window**: A small window showing XML/HTML code snippets, including 'x:mhsrc="http://www.iakutc.oadcast"/>/item' and 'section' tags.
